Election/Restrictions

1. Restriction to one of the following invention is required under 35

U.S.C. 121:

- I. Claims 1-12,20-31, 34-47,54, 55-59, 60-74,82-89 drawn to Session/connection parameter setting, classified in class 709, subclass 228.
- II. Claims 13-18,32,48-53, 75-80, drawn to Parsing, syntax analysis, and semantic analysis, classified in class 717, subclass 143.
- III. Claims 19, 33,54, 81 drawn to Network resources access controlling, classified in class 709, subclass 229.

2. Inventions I - III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as lacking "Parsing, syntax analysis, and semantic analysis", "Network resources access controlling", particulars.

Art Unit: 2154

Invention II has separate utility such as lacking "Network resources access controlling", particulars. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for one group is not required for another group, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Duke W. Yee on 07/19/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
